 - A fullstack web application
 - ado1qphananywhere.com
- PixelToVoxel-Recas AB
 - October 2025-2026-06-07
 - Praxis + Thesis work

Yusuf Isse

Software Engineer

PROFILE

A passionate Computer Engineering student in third year with a focus on software engineering. Through education and hands-on projects, I have developed strong skills in Python, C++, JavaScript, and full-stack development. I am now seeking the opportunity to join a company as a software engineer, where I can take part in the development process in a professional environment and contribute with my drive, technical curiosity, and collaborative mindset.

WORK EXPERIENCE

Essity, Lilla Edet — Warehouse Worker

May 2024 – present

I worked as a summer employee in 2024 and was offered an extended contract until June 2026.

Klubbku, Trollhättan — Substitute Childcare Worker

August 2022 – April 2023

Provided childcare support by supervising children, ensuring a safe environment, and leading structured activities and play to support learning and daily routines.

Recas AB, Trollhättan — Software Engineering Praxis

October 2025 – present

Contributed to proof-of-concept development by prototyping and testing solutions to validate ideas; supported thesis-related work at Recas AB.
